

ROSHAN RAJANI

Senior / Lead Frontend Engineer | Angular, React & TypeScript | AI-Enabled Engineering

Jersey City, NJ | 361-228-2058 | roshanrajani45@gmail.com | linkedin.com/in/roshr234

PROFESSIONAL SUMMARY

Senior/Lead Frontend Engineer with 10+ years of experience building secure, scalable enterprise applications across retirement, banking, payments, payroll, and HR. Frontend-first with deep Angular/TypeScript expertise, hands-on React experience, and strong API/integration knowledge across Node.js, Java/Spring Boot, REST, and GraphQL. Experienced in frontend architecture, performance, accessibility, security, testing, CI/CD, production delivery, technical leadership, and AI-assisted engineering workflows.

CORE SKILLS

Frontend: Angular, React.js, TypeScript, JavaScript, React Hooks, Redux, RxJS, NgRx, HTML5, CSS3/SCSS, Material UI, responsive design, accessibility

Architecture & APIs: Reusable component architecture, REST, GraphQL/Apollo, microservices/BFF integration, SAML SSO, authentication/authorization, caching, error handling

Backend / Cloud / Data: Node.js, Express.js, Java, Spring Boot, Socket.IO, Redis, SQL, MySQL, MongoDB, DynamoDB, AWS, Terraform

Quality, Delivery & AI: GitHub Copilot, AI-assisted development, Jenkins, Git, CI/CD, SonarQube, ESLint, Jasmine/Karma, Selenium, Postman, Kibana, Grafana, code reviews, mentoring

PROFESSIONAL EXPERIENCE

Transamerica | Lead Software Engineer | Apr 2023 - Present | New Jersey

Key platforms: Participant Experience (PX), supporting 3.8M plan participants and approximately \$246B in retirement assets; Custom Advisor Managed Accounts (CAMA), supporting approximately \$5.4B in AUM.

- Lead end-to-end technical design and delivery of secure digital capabilities across retirement, investment, enrollment, withdrawal, rollover, account-management, and financial-wellness journeys.
- Design reusable, responsive, and accessible Angular/TypeScript components, shared services, complex forms, data visualizations, and state-management patterns.
- Shape REST and GraphQL contracts and integrate frontend applications with Java/Spring Boot services, AWS-hosted components, CMS content, and third-party platforms.
- Contribute to Spring Boot service layers, REST endpoints, BFF integrations, and Redis-backed workflows in partnership with backend and platform engineers.
- Improve security, reliability, and performance through SAML SSO, role-based access, entitlements, feature flags, logging, monitoring, and root-cause analysis.
- Drive code/design reviews, engineering standards, mentoring, testing, CI/CD, releases, production validation, and post-release issue resolution.

Wells Fargo | Lead Software Engineer | Sep 2022 - Apr 2023 | New York, NY

- Designed and developed React.js and TypeScript features for a data-intensive financial-risk platform covering model cycles, workstreams, reporting, and governance workflows.
- Built reusable React components with Material UI and Redux for multi-step workflows, shared application state, validation, and loading/error states.
- Developed Node.js/Express REST endpoints and middleware for file upload, validation, data transformation, Excel/CSV processing, and Python-service integration.
- Implemented asynchronous workflows and real-time status updates using async/await, Promises, Express middleware, and Socket.IO.
- Partnered with architects, backend, QA, model owners, and business teams on technical trade-offs, testing, releases, troubleshooting, and performance improvements.

Transamerica | Senior Frontend Developer | Mar 2021 - Aug 2022 | New Jersey

- Built responsive participant-facing modules using Angular, TypeScript, RxJS, NgRx, REST APIs, SCSS, and reusable UI component libraries.
- Delivered retirement planning, investment, loan, withdrawal, profile-management, and self-service workflows with secure navigation and entitlement-driven content.
- Implemented shared services, route guards, HTTP interceptors, reactive forms, API integration, centralized error recovery, and Jasmine/Karma unit tests.
- Partnered with Product, UX, backend, QA, and operations teams from requirements and design through release validation and production support.

IBM | Angular Developer | Jan 2021 - Mar 2021 | Remote

- Developed Angular/TypeScript modules for internal HR and workload-assessment applications using IBM Carbon Design System, SCSS, reusable components, REST APIs, and Jasmine/Karma tests.

Paychex | Frontend Developer | Mar 2018 - Dec 2020 | Rochester, NY

- Built payroll, HR, real-time payments, onboarding, calendar, and scheduling applications using Angular/AngularJS, TypeScript, JavaScript, REST APIs, MySQL, and MongoDB.
- Modernized AngularJS and Flash workflows into maintainable single-page applications using reusable components, routing, lazy loading, reactive forms, and shared services.
- Developed reusable validation, scheduling, and data-visualization capabilities; integrated backend APIs and supported SQL/NoSQL-driven workflows.
- Supported AWS CloudFront/S3 deployments, Jenkins pipelines, Selenium testing, Grafana monitoring, production troubleshooting, and transaction tracking.

Serco (Google) | IT Analyst / Web Developer | Sep 2014 - Dec 2015 | Hyderabad, India

- Developed MEAN-stack internal applications using AngularJS, Node.js, Express.js, MongoDB, REST services, JWT authentication, JavaScript, HTML5, CSS3, and Bootstrap.
- Implemented API integration, CRUD workflows, validation, authentication, and responsive interfaces for product-feedback and escalation processes.
- Diagnosed UI/API issues, resolved cross-browser defects, supported releases, and maintained internal tools used by Google support teams.

EDUCATION & RECOGNITION

Master of Science in Computer Science - Texas A&M University-Kingsville

Bachelor of Technology in Computer Science and Engineering - Jawaharlal Nehru Technological University

Recognition: Transamerica STAR Award for Outstanding Performance
